**Re- think your water consumption.**

At school, we are having a big push on all things eco. Over the half term and next term, our biggest target is water consumption and water education. To get everyone involved in this push, we are going to be having a **school competition**.

All we want children to do, is to create some saving water posters! *Posters must be full of facts and tips all about reducing water usage, it must be bright, colourful and eye catching!*

**Examples:**

**How to enter.**

Create your own poster at home and give it to Miss Hindle or Miss Pemberton by Friday 24<sup>th</sup>.

**Who will judge the winners?**

The eco-committee will decide which posters are the winning posters. We will not reveal who each poster owns to until we have decided the winner based on the work.

**What will the winner get?**

The winner will get a prize from the eco-committee and their poster will be displayed in and around the school environment.
